Round 2 - Seed round, \$0.10, 27.5million. linear release at token generation event.

Round 3 - If necessary issue one further round, token price TBA.

## Tokenomics Breakdown

PANX is the utility token that powers the Panorama ecosystem.

### Staking / Liquidity Mining Reserve:

Reserving the largest portion of tokens for user rewards makes the most sense for the sustainability of the protocol.

### Treasury:

The treasury fund will be reserved for PANX token holders to vote on its utilization via governance proposals.

### Team:

A much slower release of PANX prevent any unreasonable expansion in supply.

### Liquidity:

Having ample liquidity reserves is the most prudent course of action
